Art Unit: 2754

***Election/Restriction***

1. In view of the amendment filed on November 15, 1999, the restriction requirement has been amended as follows.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 18, 19, 21-29, 31-33 and 42-60, drawn to a flux-guided magnetoresistive head of a magnetic recording system, classified in class 360, subclass 113.
- II. Claims 20 and 34-41, drawn to details of the read circuitry of a magnetic recording system, classified in class 360, subclass 55+.

Claims 17 and 30 are linking claims.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a disk or tape drive that does not require the

specifics of the circuitry recited in Group II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Any inquiry concerning this communication should be directed to William R. Korzuch whose telephone number is (703) 305-6137.
